Goggle Blue

What are the best kind of goggles to get?

*I have had bad luck with my goggles. I broke my blue vanquishers then I broke my black ones and I just bought them like 2 months ago. At championships I bought these TYR goggles which I thought were amazing but they wouldn't stick on my face unless it was dry! Please! I need help!
I swim competitively*

Get some "View" goggles, the Blade v120. They fit perfect, i know they're alot of money well mirrored ones are more but they are a good set of goggles. By the picture of them, you can easily tell this. If you are looking for something half the price quite abit cheaper I'd go for some keifer goggles the ufo racer, ones. They are a good fit, but after using them for about 2 months of heavy training i was going to put them on and over my head they broke.

Hope i helped, tell me which ones you chose afterall. (:
